Platform engineer with 6 years of experience in Python, cloud infrastructure and reliability.

Experience

Platform Engineer, CloudNine (2020 - 2026)
- Built Python automation and FastAPI internal tools; designed REST APIs with versioning and pagination.
- Designed distributed architecture with Kafka and RabbitMQ queues, scalable to 10,000 requests per second.
- Led a team of 4 engineers and mentored juniors; owned on-call rotation and wrote postmortems after incidents.
- Deployed infrastructure on AWS and GCP using Terraform, Kubernetes, Docker, Jenkins CI/CD and Grafana monitoring.
- Improved database performance with PostgreSQL index tuning and Redis caching, reducing latency by 45%.
- Wrote pytest suites with 85% coverage; investigated incidents to find root cause.

Education

M.Tech Software Systems, Indian Institute of Technology
