Software engineer with 4 years of experience in Python backend development and team collaboration.

Experience

Backend Developer, ShopSphere (2022 - 2026)
- Built REST API endpoints in Flask and FastAPI used by the mobile app; documented with Swagger.
- Designed PostgreSQL schemas and wrote SQL queries with indexes for the orders module.
- Mentored two junior developers, ran code review sessions and onboarded new hires.
- Wrote pytest unit tests for core payment logic; set up a basic CI pipeline.
- Containerised services with Docker and deployed to AWS.
- Collaborated with product managers and presented release plans to stakeholders.

Education

B.E. Information Technology, State Engineering College
